

Filter sleeves

Under the brand SEFAR TETEX NF we offer a comprehensive range of filter bags for dust filtration systems in the milling industry.

On request, customized sizes are available In addition to the standard sizes.

Product Features

Sefar filter solutions for Filter Sleeves

Dust bags are used in a large variety of applications and industries. Especially where dry powder particles need to be filtered from airflow and where particles aren't allowed to enter the atmosphere. Whether it's in the food industry or in the chemical, mineral & environmental industry, Sefar offers tailor-made solutions for all kinds of dust collector bags.

Sefar manufactures filter sleeves in styles to suit most models and types of dust collectors.

Bags fabricated to specification from selected needlefelts and woven fabrics.

Our vast range of available felts in various weights and surface treatments, combined with local state-of-the-art manufacturing facilities, allow us to offer you the best solution for your individual application.

- Dust filter bags can be manufactured to order

Filter media technology

SEFAR **TETEX** NF dust filters are made from high-quality needle-felt. The oil- and water-repellant felts (NFI) are also available in an antistatic version (NFIA).

- For low pressure filters, a PET needle-felt of 350 g/m² is used
- For high pressure filters and PET filter bags a 500g/m² needle-felt is used

SEFAR TETEX NF

- Needle felt filter media for fine particle
